

Tukwila natural gas main replacement project

February 16, 2016

In an ongoing effort to deliver safe and reliable energy to our Tukwila-area customers, Puget Sound Energy's natural gas system maintenance program will soon be underway in your neighborhood. The work requires PSE to replace the existing, underground natural gas main, installed in 1979, with corrosion-resistant plastic main. We are committed to completing the work with as little inconvenience to you as possible. Please see below for project details.

Work details

- Who:** Natural gas crews from PSE and InfraSource
- What:** Replacing the underground natural gas main
- When:** Work is to begin the week of February 22 and is expected to last approximately seven weeks
Work hours: Monday through Friday, 8 a.m. – 4 p.m.
- Where:** On 57th Avenue South just south of South 149th Street to South 147th Street and on South 147th Street from 57th Avenue South to 59th Avenue South (please see map on reverse)

Sewer safety

If our project involves boring underground near your sewer or septic lines, we will conduct a follow-up inspection of your lines by inserting a camera through them. Although our installers take care to avoid sewer and septic lines, on rare occasions, a gas pipeline is inadvertently installed through those lines, which are often not mapped or detectable using above-ground sensors. This inspection verifies your sewer is clear of a gas line. Visit pse.com/sewersafety for information about PSE's work with Hydromax USA to prevent cross bore danger.

What you can expect

- Signs and traffic control flaggers will guide vehicles through the work zone
- There will likely be noise from trucks and heavy machinery
- **Some customers may experience a short interruption of natural gas service during this time.** We will notify impacted customers prior to beginning work requiring an interruption in service
 - If you are home when the work is complete, a technician will reconnect your natural gas service and complete safety checks on your gas appliances immediately
 - If you are not home when the work is complete, please give us a call at (888) 225-5773 and a technician will be out as soon as possible to reconnect your natural gas service
- This work should not impact electric service in the area

We are proud to serve in your community and aim to complete the work with as little disruption as possible. Thank you for your patience as we work to complete this project. If you have questions or concerns, please contact me at the phone number or email listed below and reference project **#109091600**.

Sincerely,

John Guay, Project Manager
