Hanel Hydro

TUC-WP 4

The scope of this project is to modify the existing fire alarm sprinkler monitoring only system by adding one addressable dual input module to accommodate a tenant improvement extension of an existing wet pipe sprinkler system to protect a new vertical enclosed automatic storage and retrieval system (ASRS).

The fire alarm system will continue to communicate to the central station monitoring via the existing onboard DACT communicator and the existing Telguard Cellular Communicator.

All Zones, Annunciators, Power Supplies, Dialers, Monitoring, and Control Panels are existing and untouched.
