We will have six borings in the roadway on South 152nd Street, and one boring near the detention pond located east of the intersection of South 152nd and 42nd Avenue South. We will also have two test pits with infiltration tests off of the south shoulder on South 152nd. I attached a site plan showing the approximate locations of our borings. We anticipate the borings will take up to two days to complete and the test pits will be completed in one day.
