Popeyes TUC-RC 4

Ti build out of popeyes

We are adding one 70 amp breaker to existing panel which is feeding a 75 KVA transformer, which will go into a new subpanel. This will use preexisting circuits which will redistribute power to lighting and kitchen equipment. New circuits will be added to the new subpanel also. We are not altering the service or feeders, just adding a subpanel and reconfiguring the panel to meet our needs for this project.
