GENERAL Material and methods of application used for recovering or replacing an existing roof covering shall comply with the requirements of Chapter 15 of the International Building Code. STRUCTURAL AND CONSTRUCTION LOADS Structural roof components shall be capable of supporting the roof-covering system and the material and equipment loads that will be encountered during installation of the system.	

ATTACHMENTS REQUIRED	ATTACHMENT FILE NAME
<p>RECOVERING vs REPLACEMENT New roof coverings shall not be installed without first removing all existing layers of roof coverings where any of the following conditions occur:</p> <ol style="list-style-type: none"> 1. Where the existing roof or roof covering is water soaked or has deteriorated to the point that the existing roof or roof covering is not adequate as a base for additional roofing. 2. Where the existing roof covering is wood shake, slate, clay, cement or asbestos-cement tile. 3. Where the existing roof has two or more applications of any type of roof covering. <p>REROOF – REPLACEMENT Per Section C402, Table C402.1.3 and C503.3.1 of the Washington State Non-Residential Energy Code, installation of insulation is required under the following conditions: The roof membrane is being replaced (existing torn down to bare deck) and the roof sheathing or roof insulation is exposed; or there is not existing roof insulation below the deck. Roofs without insulation in the cavity and where the sheathing or insulation is exposed during reroofing shall be insulated either above or below the sheathing.</p> <p>Insulation values required: R-38 or U=0.027</p>
